A NEW ERA OF OUTDOOR CLIMATE COMFORT

The core feature of Elitewood insulated patio covers is their insulated panels. These panels provide exceptional thermal performance, keeping the patio cooler in summer and warmer in winter, making outdoor spaces comfortable year-round.

INSTALLATION

Installation is a breeze, typically completed within a two-day period, minimizing disruption to your outdoor enjoyment.

RESIDENTIAL

- Extend outdoor living space
- Patios, pool areas & courtyards
- Rooftop structures

COMMERCIAL

- Restaurants
- Office
- Shade Canopies

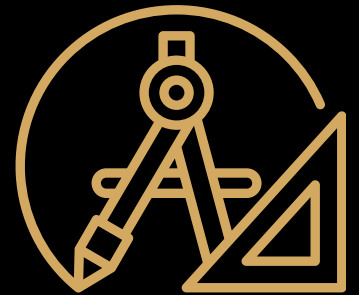

TIMELESS BEAUTY

These features are available in various colors and finishes and can be customized to match the aesthetic of any home. The elegant design options integrate with existing architectural styles.

DESIGN AND ENGINEERING

A well-designed and functional insulated patio cover can significantly increase the perceived value of your property, making it a wise investment for homeowners. We focus on customization, and our clients get outdoor features perfect for their property.

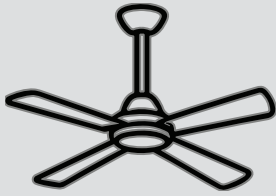

ELEGANT DESIGN

Our company always provides the perfect balance of styling, quality, customer service, and cost-effective solutions.

VIRTUALLY MAINTENANCE FREE

The covers require minimal upkeep, and the aluminum material resists rust, corrosion, and fading, ensuring the structure remains attractive and functional over time without frequent cleaning or painting.

ADDITIONAL UPGRADES

LIGHTING & ELECTRICAL

Recessed Skypanel LED lights, smart dimmers, and ceiling fans.

CLIMATE & COMFORT

Electric heaters and misting systems.

WALLS & PRIVACY

Motorized or manual retractable screens,, lattice privacy walls, and vertical sunshades.

AND MANY MORE...

RAIN PROTECTION

These high-quality aluminum patio covers are engineered to withstand harsh weather conditions, including intense sun, heavy rain, and strong winds. The robust construction ensures longevity and minimal maintenance.

SOLAR CONTROL

This cover is great for completely blocking the sun out and reducing the heat underneath the cover because of the insulated panels with aluminum skins on either side to mimic the look of cedar wood.

ALUMINUM FRAMING

These innovative features use premium materials, including an insulated aluminum roof system that minimizes heat transfer, reducing energy costs and maximizing enjoyment of the outdoor area.

TECHNICAL SPECIFICATIONS

ROOFING MATERIAL

Each roof panel is made up of a 1.5lbs polystyrene core with a standard .024" thick laminated aluminum on both sides. There is an option to upgrade to .032" thick skin for additional strength and span.

FRAME MATERIAL

Roll formed aluminum that mimics the look of Cedar wood.

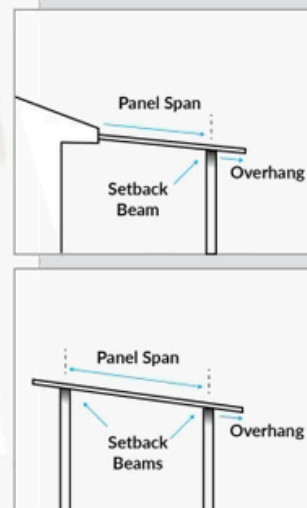

SUPPORT STRUCTURE

Options for structural beams and specialized architectural columns.

RAIN PROTECTION

Integrated gutter system for water management.
