COVERING AN EXISTING PERGOLA

Topping your pergola with a polycarbonate roof transforms it from a fair-weather feature into a true all-season outdoor room

DURABILITY

Polycarbonate panels are virtually unbreakable – up to 200 times stronger than glass – yet lightweight and crystal-clear, letting natural light pour through while blocking up to 100% of harmful UV rays.

FUNCTIONALITY

The panels also insulate against heat and noise, soften the drum of a downpour into a gentle hush, and resist yellowing, cracking, and warping for decades.

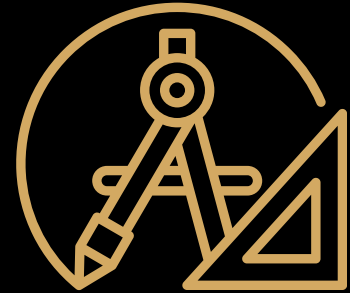

SHELTER WITHOUT SACRIFICE

- Leakproof
- Impact and hail resistant
- 3 light transmission choices block 100% of UV rays, which reduces temps underneath

DESIGN AND ENGINEERING

This leakproof roof system is engineered to handle it all—high winds, heavy snow loads, pounding hail, and relentless sun.

ELEGANT DESIGN

Designed for long-term, low-maintenance performance, our system keeps your outdoor space protected and usable year-round.

VIRTUALLY MAINTENANCE FREE

Rain, snow, falling leaves, and harsh sun are turned away overhead, so your patio furniture stays dry, your grill stays usable, and your gatherings never get rained out.

RAIN PROTECTION

Don't let rain spoil that outdoor gathering—create some extra living space for your home.

Produced from the most weatherable polymer on the market, ACRYLITE® acrylic sheet outperforms other covering products like fiberglass, polycarbonate and PVC product.

SOLAR CONTROL

Protect your deck or favorite outdoor environment, cover a spa or pool while still enjoying natural light. Block the harmful UV rays without blocking the light from nearby doors and windows.

ALUMINUM FRAMING

Fully engineered, structural aluminum framework is easily adaptable to suit virtually any application

TECHNICAL SPECIFICATIONS

Sheet Width: 23"

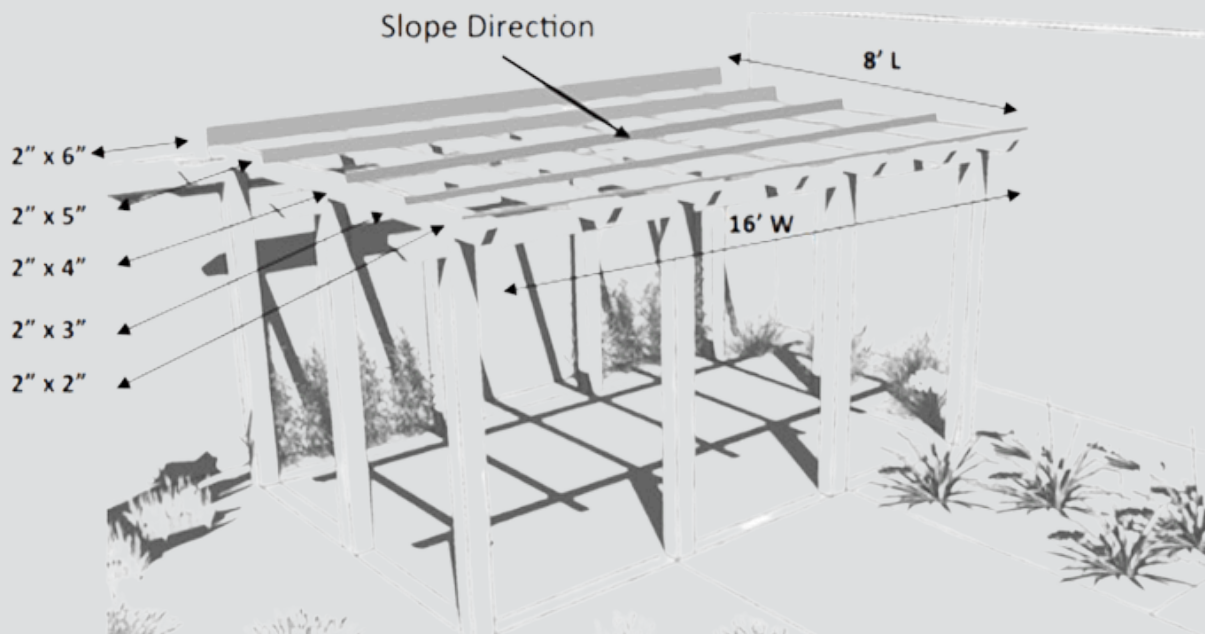

Sheet Length: We stock pergola cover sheets up to 36' and can provide lengths up to 52'. Orders over 36' just need a few extra shipping steps, so those are completed through a sales rep instead of online.

Thickness: 8mm

Colors: 3 standard colors in stock; Bronze, Clear, and White. Custom colors upon request.

Sheet Structure: 4 wall standing seam
